HOMEWORK/QUIZ SUBMISSION GUIDELINES

When submitting homework, or quizzes please adhere to the following criteria:

1. **Problem Statement Summary:** Begin each problem with a clear and concise summary of the problem statement. You may either paraphrase the problem in your own words or transcribe it as presented in the text or assignment. The objective of the problem should be evident from your summary. At the end of the semester, *you should be able to review your work and understand each problem's goal without needing to refer to external resources, including the textbook.* **Points will be deducted if the problem statement is missing.**

2. **Solution with Explanation:** Provide a detailed solution for each problem, ensuring that your explanation is thorough enough for a peer who is unfamiliar with the material to follow your reasoning. While you need not explain basic arithmetic or algebraic steps, you should clearly justify the logic behind your approach. *Your solutions should be comprehensive enough that you could revisit them six months later and understand your work without external references.* **Points will be deducted for insufficient explanations.**

3. **Academic Integrity:** Adhere to the academic honor code at all times. Plagiarism—using someone else's ideas as your own—is strictly prohibited. This includes copying from a classmate, instructor, textbook, or online sources. If you consult external resources, be sure to cite them appropriately. Credit must be given

for any ideas borrowed from others. **There are no penalties for citing sources**, but *plagiarism can result in serious consequences, from a warning (first time only) to expulsion*.

4. **Timely Submission:** *Staying current with the class is crucial to your success*. Ensure that you are progressing at the same pace as the class. If you encounter difficulties with a problem, utilize available resources, including professor office hours, TA office hours, the Math Learning Center (MLC), the Academic Success and Career Center (ASCC), or your classmates. Do not hesitate to reach out via email for additional support.

Please follow these guidelines to ensure your submissions meet the expected standards.
